The project reflection paper should discuss what happened during the project creation, from a first-person (your experience) point of view. The paper must be done individually; for group projects, each student will turn in her or his own paper discussing their part of the piece. The paper should include all of the following:

1. The name of your project.
2. Several photos of your project (in-process & final)
3. List your project partners. (if in a group)
4. Describe the project as it was finally presented.
5. Describe how the piece and your ideas came together
6. How much time did you spend on it? What work did you do? Please describe your particular contribution and work done in the following 5 categories. Also, indicate overall percentage of your time spent in each category:
   - concept development
   - construction & craft work
   - electronics & mechanics
   - programming
   - installation
7. Overall, what percentage of time was spent on the art side? What percentage was spent on the technology side?
8. During your process, what worked well? What did not work well?
9. What are your observations about viewers' interactions with your piece?
10. Please include any other thoughts or reflections that you feel are important.
11. Include your code

The paper should be at least 5 pages in length (not including the code).
